DISTRICT SYSTEM MANAGEMENT PLAN

DISTRICT 11 PROJECT LIST

OCTOBER 2014

This page intentionally left blank.

DISTRICT SYSTEM MANAGEMENT PLAN

PROJECT LIST

SYSTEM PLANNING FACT SHEET

The DSMP Project List is a dynamic list of projects that are partially programmed or planned. The projects are derived from the Regional Transportation Plans (RTPs) of the San Diego Association of Governments (SANDAG) and the Southern California Association of Governments (SCAG) including the Long Range Transportation Plan (LRTP) of the Imperial County Transportation Commission (ICTC). The list also includes State Highway Operation and Protection Program (SHOPP), Maintenance Plan, and Intercity Rail projects. The DSMP Project List is updated by the end of June in odd-numbered years.

The Project List contains State Highway System (SHS) projects and multimodal projects, including pedestrian and bicycle facilities. The list also includes off-system projects of major regional and interregional importance that District 11 strongly supports to emphasize the importance of non-SHS projects to corridor mobility.

The DSMP Project List:

- Provides consistency among Districts, Headquarters (HQ), and partners in the types and categories of candidate improvement projects
- Is a vital communication tool when working and negotiating with our partners, in particular, with regional agencies during RTP development, when seeking local sales tax measure funding, and potential funding for development mitigation projects
- Provides information that may be used in the development of the California Transportation Plan (CTP) and other statewide transportation plans, policies, reports, and documents that may be required by existing and new state and federal laws governing intermodal planning

Projects on the DSMP Project List are categorized into five tiers:

Tier I: Partially programmed projects

Tier II: Fiscally constrained projects that are not programmed

Tier III: Projects that the District will advocate to be included in fiscally constrained project lists (RTP, SHOPP, etc.) during the 20-25 year planning horizon

Tier IV: Projects that have a demonstrated need within the 20-25 year time horizon, have been identified as high priority by the District, and are unlikely to receive funding within the 20-25 year time horizon

Tier V: Other projects identified as needed by the District that are within the 20-25 year time horizon, beyond the 20-25 year time horizon, and/or only conceptual in nature

The DSMP Project List contains project location and description fields in addition to the following information:

- Lead Agency
- California Transportation Commission (CTC) Project Category
- Source Document (e.g., RTP)
- Funding Source and Cost Estimate
- Unconstrained RTP Status (No Identified Funding Source)
- Proposed Completion Year
- Transportation Mode
