

Fundamentals of Partnering

A one-day free training for the construction industry

Sponsored by Caltrans

Who should attend?

All construction industry stakeholders including owners, contractors, subcontractors, local agencies, consultants, small businesses and Caltrans staff planning to work on transportation projects:

- Project Managers
- Superintendents
- Foremen
- Lead Workers
- Project Engineers
- Estimators
- Partnering Facilitators

Why should YOU attend?

1. Learn the principals of Partnering and how it increases the odds of your project's success.
2. Establish relationships with owners and prime contractors.
3. Know the requirements of the Caltrans Partnering Specification and the Field Guide to Partnering on Construction Projects.
4. Take away tools and understanding about how to make Partnering successful and make a measurable difference on your project.
5. Discover how to integrate Partnering into problem-solving and dispute resolution.
6. Be aware of the standards and expectations for Partnering facilitators.
7. Know where to get resources and support for Partnering.
8. Find out about Caltrans and other Partnering awards to celebrate your project success.

About the Trainers

A team of trainers who work on Caltrans construction projects will be leading the sessions. These trainers have used the principles they teach and will provide tools and practical tips on making them effective.

"I've observed a huge transformation in project teams after taking this training. They learn real tools for solving project issues in a way that is good for the project."

— Chris Hickey, William P. Young
Partnering Trainer

What Executives Are Saying

"Partnering is fundamental to the success of our industry. We expect our staff to attend this training."

— John Franich, Granite
Mike Ghilotti, Ghilotti Bros.
Todd Sutton, Skanska USA Civil
Rick Land, Caltrans

About Partnering

Effective Partnering brings teams together to establish common goals and build trust. The measurable results include lower project costs, shorter construction schedules, fewer disruptions to the traveling public, safer jobsites, fewer claims (typically zero) and faster project close-out!
