**Subject:** Re: Caltrans 03-1A8454 DBE Invitation to Bid

Hi -

Thank you for the invitation to bid. Our firm provides land use planning and environmental consulting services. We do not provide construction-level services. Unfortunately, the services and skills we offer do not seem to be a match for your needs on this bid.

Please keep us in mind for future proposals requiring the type of planning and permitting services we offer.

Hi Karen,
We would definitely be interested in bidding with you on this project but our services entail cultural, archaeological, historic buildings, paleontology technical document and construction monitoring services and I don't see them listed on your flyer. If Caltrans doesn't already have a firm like ours on board (they usually have a 3-5 year contract for our types of companies) I would love to team with you on this project. Let me know what documents you need and I will send them right away. We are SBE/WBE/DBE/UDBE/LBE/CBE/VSBE/MicroBE certified.
Thank you for your consideration.
Robin Turner

Subject: Estimate Proposal for
Hot Mix Asphalt Quality Control Inspection and Testing
Contract No. 03-1A8454, Route 89, El Dorado County

John,

We have prepared a cost estimate for performing Quality Control Testing of the Hot Mix Asphalt – Type A (HMA-A) for this contract in accordance with the special provisions dated November 3, 2014.

The estimated costs presented on the following page are based on:

- HMA-A production, continuous Monday through Friday day shifts (6,160 tons)
- QC Plan
- Data Cores
- Inertial Profiling

Our costs are based on the following:

- For HMA-A production, we will utilize a Field Technician to monitor in-place density, perform CT 375 per the special provisions and obtain the required cores for density determination. We assume that the material supplier will perform sampling of HMA-A and aggregates at the plant in accordance with the Project Special Provisions
- We assume that a production shift will consist of 8 hours of HMA-A placement
- For HMA-A, we will utilize a second field technician to prepare a nuclear gauge correlation in accordance with CT 375 whenever the following occurs: the first day of placement of a new material, whenever there is a change in paved thickness greater than 0.03 feet from the material thickness of a previously determined correlation, or whenever there is a change in underlying material
- We assume that the material supplier is accredited by AASHTO and certified by Caltrans-for AASHTO test methods and will provide the following during production: Job Mix Formula, Job Mix Formula Verification, Plant Inspection, sieve analysis, sand equivalents, aggregate moisture contents, oil contents, and HMA moisture contents in accordance with the Project Special Provisions
- We propose that RMA Group will perform the following production quality control laboratory tests: percent crushed particles, Los Angeles Rattler, flat and elongated particles, fine aggregate angularity, maximum theoretical density, core density, Hamburg wheel track, and moisture susceptibility
- We assume Smoothness Testing in areas requiring the use of a 12-foot straightedge will be performed by the Contractor

- We assume that there will be sufficient time during production to obtain data cores and that the Contractor will provide all necessary traffic Control

- We propose that RMA Group will perform the inertial profiling in accordance with the Project Special Provisions utilizing a Dynatest Model 5051 Mark IV inertial profiler. All equipment and operators are Caltrans-certified to perform inertial profiling. Shift rates include 8 hours of on-site time, data processing, and report preparation.

- We assume that production will be consecutive, Monday through Friday day shifts. In the event production stops for more than 24 hours, Monday through Friday, an additional mobilization fee will be charged.

The following is the summary of our estimated costs, which were calculated using the scope of work and construction duration assumptions presented herein:
