Depending on the location you want to access the water we can provide either. If you access the water supply from Hwy 152 & 33, we have potable water, all other locations are non-potable.

Lon

Hi Lou,

Ok sounds good. One more question, is the water potable or non-potable? Thanks again.

Thank you,

Rhodel,

We can provide the water but you may need to drive your water truck several miles to the closest location for access to our system. The cost for water will be \$1,400 and your contractor will need to come to the District office to pay for the water and obtain access instructions.

Thanks

Lon Martin

Subject: Caltrans project requiring water source (EA #10-1E0901)

Hi Lon,

It was a pleasure speaking with you over the phone.

To summarize my request, I have a bridge maintenance project that will require roughly 500 gallons of water (potable or non-potable) for work on Merced I-5 at various locations from postmile 13.9 to 27.4, Volta Road to Allen Road (see attached plans for exact locations). Please advise if San Luis Water District can be listed as a water source for this project, and the required information/application needed once the contract begins Summer 2016. Thanks for your time.

Thank you,
